CIA Agents Covert Subversion In Africa Creates Big Nightmare

By CHARLES P. HOWARD
UN Correspondent

UNITED NATIONS — In the past few months millions of words have been written about CIA activities here in the U.S.A., but not a line about CIA activities in Africa. Yet it is in Africa that CIA actions have been most devastating.

The CIA as an arm of American foreign policy working in conjunction with British Intelligence has made shambles of African independence.

Today there is not a single African leader with any sense of security left except those who have completely bowed to their former colonial masters and have sold out their freedom and their people.

MR. HOWARD

Independence minded African leaders know that every minute outside forces are working within their country planning their downfall or to undermine their standing with their people.

TO UNDERSTAND all this you must understand how the Western "power structure" works. American top level governmental officials — the President the Vice President, Secretary of State, Head of African Section of the State Department, all make wonderful speeches about freedom, democracy, justice, equality, helping the underprivileged, and all that propaganda in Africa.

At the same time their forces are at work in Africa completely destroying democracy, preventing justice and equality to the Africans, making the underprivileged more underprivileged, the poor poorer.

American officials, businessmen, and church people are the greatest speech makers, phrase makers and cliché inventors on the face of the earth, while at the same time controlling, directing and manipulating a devilish mechanism geared to destroy Africa.

LOOK AT Africa today — indepen-

dence and freedom in Africa is in shambles and the American CIA is its principal vehicle of devastation. Ten military coups in Africa in the last few years.

Everything honest and sincere that African leaders have built to better themselves and their fellowmen has been destroyed.

The Organization of African Unity (OAU) is on the verge of dying. Dedicated African leaders, nearly all of them, have been destroyed and the few who have survived are only hanging on by the skin of their teeth.

If you have any idea that these military coups are not the handiwork of a "central masterminded group" you are simply uninformed on the "facts of life" in Africa. No African leader has a scintilla of doubt about it. Those that have survived have simply "bowed to the inevitable."

Why was Dean Rusk, American Secretary of State, after the fall of Nkrumah able to predict so accurately that other African governments would fall?

I'll tell you why, because he controls the greatest weapon for the destruction ever invented, the CIA, which works hand in hand with British Intelligence. And after the overthrows Rusk calmly remarks "the climate for our investments is better there now."

And what is the central goal of all of this — it is the continued ownership and control of the fantastic mineral, agricultural and natural resources that land thus forcing Africans to depend on American and British manufacturers.

Directing this sinister scheme is the American government, the American press, the American businessmen and the American church forces.

THE VOICE of the dissenters are simply ineffective. Look at South Africa, South West Africa, Angola, Mozambique and Southern Rhodesia.

The church forces are the leaders in supporting what is going on in all these areas. The businessmen are furnishing millions of dollars to main-

tain what goes on there.

The U.S. government pronounces out of one side of its mouth sweet speeches and clichés, while at the same time pours in millions of dollars in financial and military aid, making these areas the strongest economic and military forces in all of Africa, while pauperizing the rest of Africa.

The Africans in South Africa and all the areas it touches are slaughtered at will and nobody does anything about it. If an African leader attempts to do anything about it, he soon finds himself dead or a refugee from his homeland.

WE ARE spending 25 billion dollars a year, we claim, so the South Vietnamese may have free elections, the right to choose their own form of government.

What about the black people in South Africa? They don't even have the right to live. The only right they have is the right to work for their white masters at starvation wages and the CIA is the principal agency that prevents African resistance.

What about Afro-Americans in the South? More than 5000 have been lynched by whites, with not a single white man being punished for the crime.

Hundreds of churches have been bombed, burned and destroyed, sometimes with little children in them. In the last few years hundreds of civil rights workers have been murdered, mutilated or beaten up and the authorities take notes, but can find nobody.

If one is discovered and brought to trial, white juries turn him free, the proven guilty and the government simply makes pious statements and say "there's nothing they can do about it states rights you know."

Just one-tenth of one billion dollars plus the government's will to do something about it would stop all this, both in Africa and America.

Isn't it about time the African, the Afro-American and honest, sincere whites rise up and say "enough? If not now, then when?"
